DETAILED ACTION

Response to Amendment

1. Applicant's amendments, filed 3/9/2007, have been fully considered and reviewed by the examiner. The examiner notes the amendments to claims 1, 4, 7, 26, and 29, where claims 1, 3-8, 10, 12-14, 17-18, and 26-31.

Response to Arguments

2. Applicants arguments, filed 3/9/2007, are directed at newly added limitations that were not present at the time of the final rejection and therefore are deemed moot and addressed below.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

4. Claims 1 and 3 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. The examiner can not locate support in the applicant's original disclosure for forming a portion of the microcrystalline thin film "without converting amorphous silicon to microcrystals" Specifically the examiner can

Art Unit: 1762

not locate support for such a negative limitation. Negative limitations recited to overcome prior art can be considered new matter. *Ex Parte Grasselli et al.* 231 USPQ 393. If the applicant can provide adequate support from the original disclosure for the negative limitation, the examiner will withdraw the rejection.

Allowable Subject Matter

5. Claims 1, 4-8, 10, 12-14, 17-18, and 26-31 are allowed.

The following is an examiner's statement of reasons for allowance:

6. Claims are allowed for the same reasons as set forth in the office action dated 12/6/2006.

Claim 26, 28, 29, and 31 and dependants: None of the prior art cited or reviewed by the examiner alone or in combination reasonably suggests supplying in a first process H_2 and SiH_4 in a ratio to prevent amorphous deposition and then stopping the SiH_4 to deposit microcrystalline silicon.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
